Every order checked before it leaves.

Live tickets you run by voice, and a phone over the packing spot that checks every bag before the courier walks out.

DOORDASH TRACK - NOVA HACKATHON · FRONT OF HOUSE AT PEAK · ROMIR PATEL

YESTERDAY · MY CHIPOTLE ORDER ON DOORDASH

I had this exact problem yesterday.

Ordered: hard shell tacos

Got soft shell.

Would’ve been caught

Ordered: kids meal

No drink in the bag.

Would’ve been caught

By the time I opened the bag, the courier was long gone. A ten-second look at the counter would have fixed both.

THE PROBLEM · DOORDASH'S TWO CHALLENGES

Timing and packing break at peak.

01 · PREP TIMING

When should this order start cooking?

Orders arrive from different apps with different timing, and pickup times move. Start too early and food sits; too late and the Dasher waits.

How can AI help coordinate prep and timing?

02 · PACKING & PICKUP

Is this bag right, and is it theirs?

Cooked isn't done. Everything has to be packed right and handed to the right person, and every fix steals time from the next order.

How can AI make pickup more reliable, with less work for staff?

OUR SOLUTION, PUT SIMPLY

One rail. Run by voice. Timed to the Dasher.

01 · ONE RAIL

Every app in one place.

DoorDash, Uber Eats, phone and walk-in orders on one live ticket rail.

02 · FULLY BY VOICE

No hands on a screen.

“New order for table 2…”, “what’s late?”, “start all the medium rare steaks.”

03 · SMART TIMERS

Timers set themselves.

From the dish and the doneness: a medium-rare ribeye gets 15 minutes.

04 · FOLLOWS THE COURIER

Start times update live.

Each ticket counts down to when to start, and moves when the Dasher runs early or late.

→ DOORDASH CHALLENGE 01: PREP TIMING

LIVE START TIMES

Every ticket knows when to start.

DASHER ARRIVES

in 21 min

Order 45 · DoorDash

-

COOK + PACK

15 + 2 min

Medium-rare ribeye, then bagging

=

START

in 4 min

The laptop calls it out on time.

`Dasher 10 min late?` “Dasher for order 45 is running 10 minutes late.”

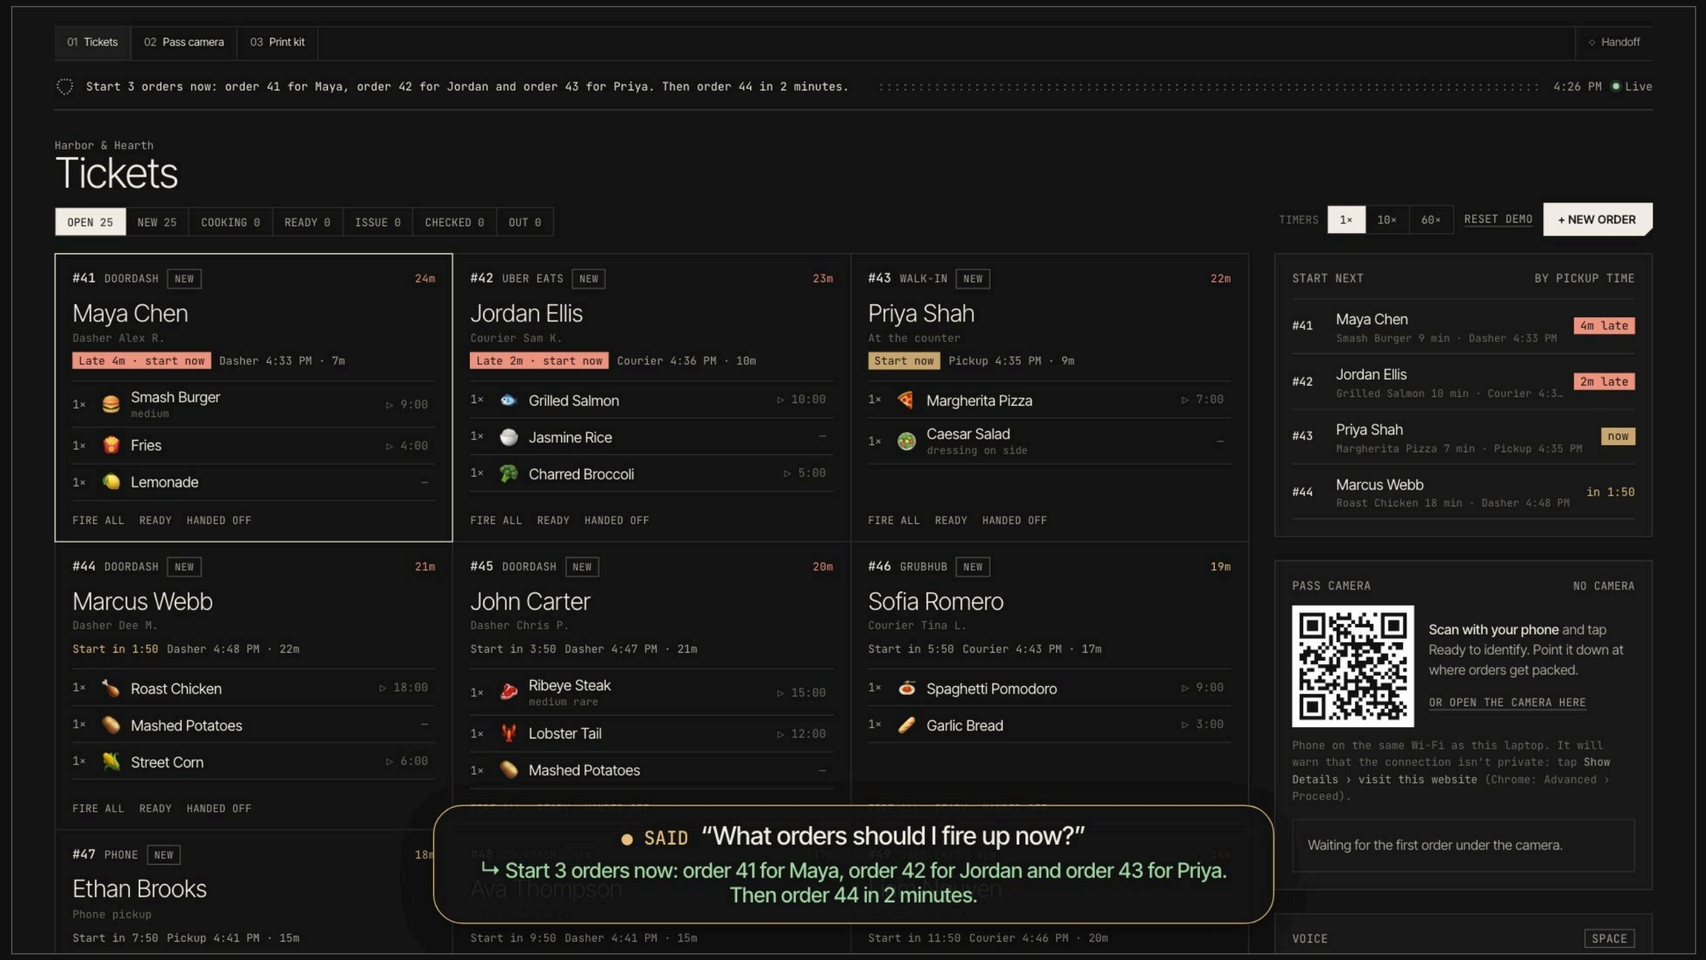

→ Start in 14 min

RECORDED · THE REAL APP

Watch it run by voice.

Each caption is a sentence said at the pass; green is what the app says back.

No taps. The rail updates as you talk.

FIXING YESTERDAY'S ORDER

A phone that checks every bag.

01 · Phone

Slide the bag under

Any phone over the packing spot. It snaps when the bag holds still.

→

02 · Claude Sonnet

Reads the photo

Names each dish, only from this restaurant's menu.

→

03 · Code

Checks the ticket

Finds the order. Lists what's missing or extra.

→

04 · Out loud

Go or hold

"Good to go, John." Or: "Missing fountain soda."

~4 s a bag, no buttons

Offline? It reads printed codes.

Next · Gemma, post-trained, on the phone

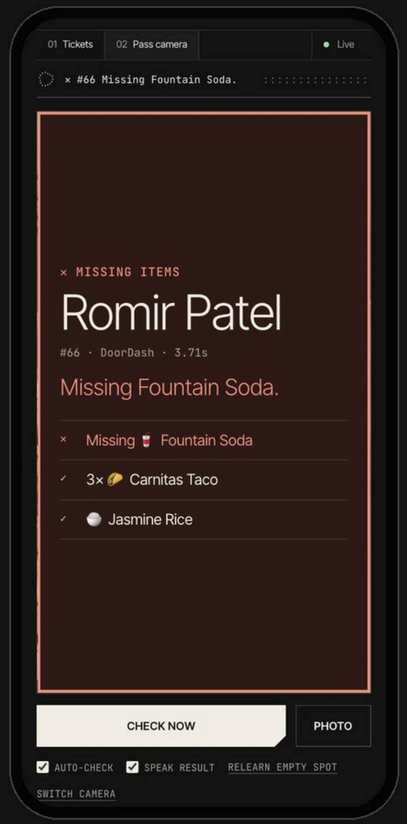

RECORDED · MY REAL ORDER

It catches the missing drink.

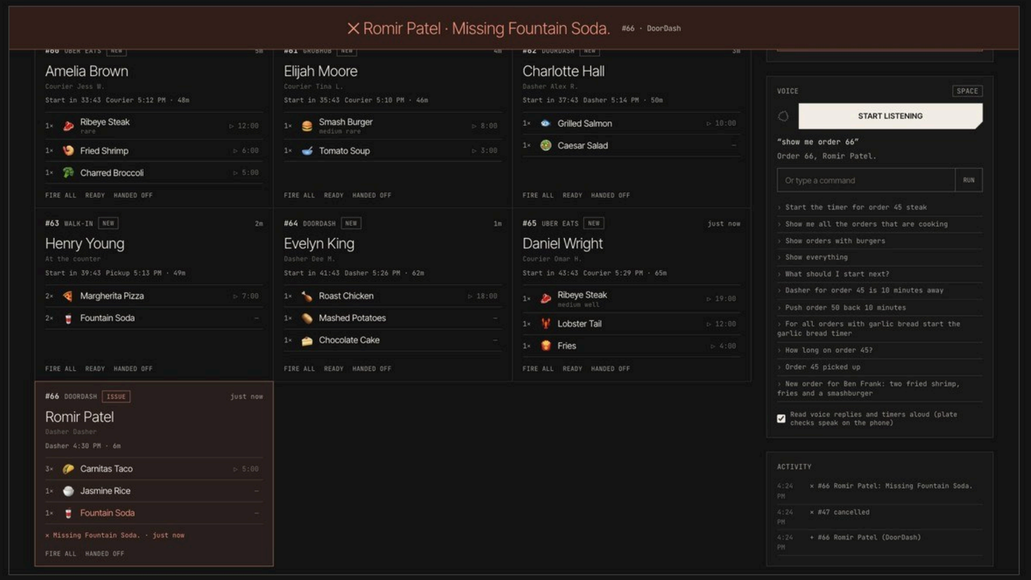

× No kids drink → caught live in 3.7 s: “Missing Fountain Soda.”

× Soft shell, ordered hard → same check, once shell type is a menu option. Next on our list.
